

The Leader in Powered Envelopes

BIPV Curtain Wall

BUILDING INTEGRATED PHOTOVOLTAICS

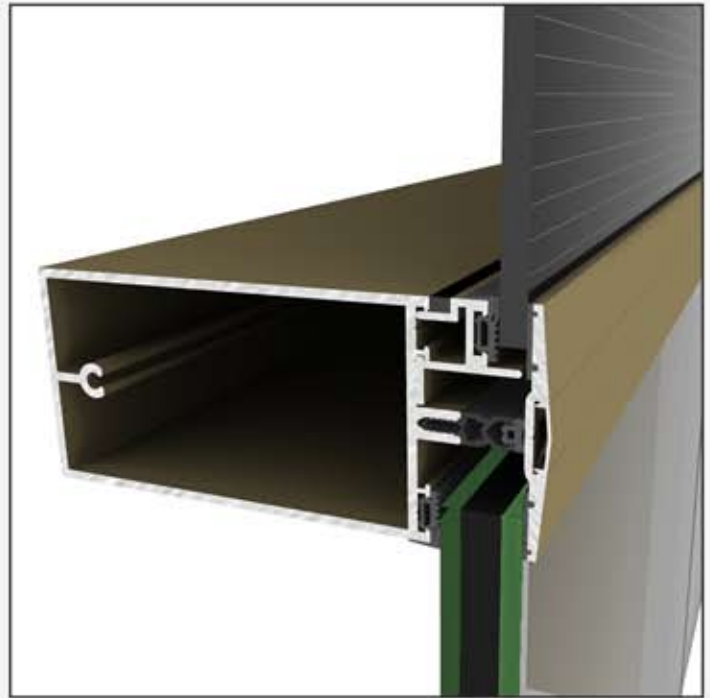

BIPV Wall from BISEM generates electricity, ensures world class energy efficiency, and provides exceptional versatility at a surprisingly affordable price.

Our engineers were tasked to develop a system that performs to European Standards of energy efficiency, while using American Standards of building constructability. The resulting BIPV Wall from BISEM, is a waterproof system that produces electricity at a competitive market price.

The system is easily installed by any qualified glazier in the United States and BISEM provides clear instructions for structural, waterproofing and electrical installation as part of the “Multi-Trade Solution”.

BISEM BIPV Curtain Wall

1. All UL Rated PV Panels are compatible with BISEM Systems, allowing ultimate versatility.
2. The BISEM System accepts any type of infill, including triple glazed insulating glass units and electrochromic glass. Sustainable design possibilities are endless.
3. Waterproof Guaranteed. Fully pressure equalized design delivers superior air and water performance.
4. Offered in both 2-1/2" or 3" wide mullion face.
5. Full BIM and project management support allows for ease of design, fabrication and material orders.
6. Easy installation and training by qualified glaziers.
7. Flexible mullion colors, allowing separate interior, and exterior aesthetic choices.
8. Made in the USA, delivering short lead times and increased LEED points.
