

BIPV Sunscreen is an economical, pre-engineered sunshade that can be installed with the BIPV Curtain Wall or any manufacturer's pressure plate curtain wall.

The BIPV Sunscreen can also be installed as a stand-alone sunscreen on to any wall substrate.

Our engineers were tasked to use standard curtain wall installation practices and develop a system that is easily installed by any qualified glazier in the US.

Clear instructions for mechanical as well as electrical installation are part of the package with this versatile product.

BISEM BIPV Sunscreen

1. All UL Rated PV Panels are compatible with BISEM Systems, allowing ultimate versatility.
2. The BISEM System accepts any type of infill, including Pythagoras PVGU and electrochromic glass. Sustainable design possibilities are endless.
3. Waterproof Guaranteed.
4. Offered in multiple frame depths.
5. Full BIM and project management support allows for ease of design, fabrication and material orders.
6. Easy installation and training by qualified glaziers.
7. Flexible mullion colors, allowing separate interior, and exterior aesthetic choices.
8. Made in the USA, delivering short lead times and increased LEED points.
